CLARESHOLM LOCAL NEWS

Mr. and Mrs. S. C. Williams have moved from Pendleton to Portland, Oregon.

Miss Fair spent Sunday and Monday in Calgary, making the return trip by motor.

Mrs. L. C. McKinney M. L. A. will give an address next Sunday night in the Methodist church.

Mrs. Isaac Lepard will entertain the Isaac Club on Wednesday afternoon September 15.

"The Right to Happiness" coming to the Rex Theater on September 24 and 25.

The sacrament of the Lord's Supper will be administered next Sunday morning in the Methodist church.

Mrs. J. C. Hooper and son Jim left on Tuesday for a visit with her parents at Prince Albert, Saskatchewan.

For Sale—At Thomas Moore's horse sale on the 15th, 16 and 17 P.P. Galloway portable engine, in first class condition.

The Ladies of the Church of England Guild will serve tea on Saturday afternoon September 11 at the Parish Hall, from 3 to 6.

Dr. B. F. Steeves is visiting in town for a few days. He has a farm near Clive and with his two boys has been operating it this season.

Threshing is pretty general this week. Reports indicate a far better crop than was expected. It's hard to beat the Clareholm district for No. 1 wheat.

Mrs. T. P. Mosley's children and grandchildren gave her a birthday surprise party Thursday evening, and presented her with a beautiful necklace as a remembrance.

John Fraser had an accident on Tuesday resulting in a broken rib. He was lifting a heavy grain tank at the time and it slipped in such a way that the strain of trying to steady it caused the rib to snap.

A wire was received this week by the Registrar from Ottawa notifying him of a change that has been made as to the manner of compiling the voters list. The list will be compiled by enumeration and will be posted up in conspicuous places by October 5. It will consequently not be necessary to register as stated in last week's Review.

Major G. H. Schoof returned from a ten days' patrol in the Livingstone Range, examining the licenses of the sheep hunters and fishermen. He reports plenty of fish but a scarcity of big game. The hardy experienced hunters are bagging both sheep and goats, but it takes long weary hours and strenuous mountain climbing to get near the game. Major Schoof goes to Edmonton Saturday to fill lecture engagements with churches, colleges and schools.

Big Raise in Freight an Passenger Rates

Ottawa, Sept. 8.—By virtue of an order issued from the offices of the Board of Railway Commissioners on Tuesday, railway companies in Canada are granted an increase of 40 per cent in eastern Canada freight rates, and 35 per cent in western rates, effective on Monday next, September 13, and to continue in force until December 31.

After Dec. 31, the increase in the freight rates in eastern Canada is reduced from 40 per cent to 35 per cent, and in western Canada from 35 to 30 per cent.

Simultaneously with the increase in freight rates, passenger rates all over the country are advanced 20 per cent, so long as they do not exceed four cents a mile. This increase is effective to Dec. 31. After that date, and for the six months' period from Jan. 1 to July 31, 1921, a 10 per cent increase is authorized. Following July 1, passenger rates return to those in force at the present time.

The judgment authorizes increases of 50 per cent in sleeping and parlor car rates, and an increase of 20 per cent in the rate on excess baggage.

Look to the Foundations

For the first time in the history of the United States the population of the cities and towns at present exceeds the rural population. This is the interesting fact that has been disclosed by the recent census of the republic. While all the figures have not yet been tabulated, examination of the returns is sufficiently far advanced to warrant the above statement, according to officials.

It has, of course, been known for a long time that one of the effects of the wonderful industrial activity brought about in the United States by the war was the exodus of people to the larger centres of population to which they were attracted by the prevailing high wages and by the demand for workers which opened to energetic and capable men, and women, too, splendid opportunities for a rapid advancement. These thousands of young men drafted from the farm into the army have not returned to the land upon their discharge from military service which, if it did not actually take them overseas, brought them into cantonments and camps on the outskirts of cities and population and introduced them to city life.

The same shifting of population is, unfortunately, taking place in Canada. While it is doubtful if the arid population of the Dominion has actually outstripped the rural, as in the United States, we are on the high road to such a development. In the old farming Province of Ontario this has already happened, and but for the fact that the three prairie provinces are still dominantly rural, the figures for Canada might well be similar to those of the United States.

Proportionately it is said that 50,000 fewer Canadians are engaged in agriculture today than in 1871. According to a recent speech by the Ontario Minister of Agriculture, 30 percent of the population some 20 years ago lived in towns and 70 percent in the country. Today the figures are almost exactly reversed—the 70 percent in Ontario live in the towns.

In a recent article in this column the question was asked as to what was the explanation, and certain views were expressed as to steps that might be taken to check this disastrous tendency on the part of Ontario to get away from the land. Nothing is to be gained, however, by blinking the fact, now generally recognized and admitted, that the industrial advancement of the Dominion has been encouraged at the expense of the agricultural. The fact has not been made attractive enough at a time when the attractions of city life have multiplied amazingly, for farming has not been sufficiently remunerative during a period when mounting wages coupled with steadily shorter hours of labor have called their appeal from the cities.

The natural, the inevitable result is the increase in the consuming public and the decrease in the number of producers. As Hon. Mr. Doherty put it: "We have believed that big money, stocks, pulp happiness and prosperity... But the real solution of all our troubles is increased agricultural production." Who can question that?

Surveyors of the monetary regime of the return of the average farmer in the Dominion were recently made showing that the majority were making less than \$1000 a year. Thirty cents an hour was the average wage of both a farmer and his wife on a 100-acre farm in the year of the agricultural survey which the modified city blazer and charwoman would reject with scorn. Needless to say such a return is not sufficient to explain why the second generation deserts the farm, without giving consideration to other factors in the problem.

There never was a time when the agricultural industry needed more generous assistance and encourage-

ment. It calls for the best thought on the part of all Governments and public bodies. The Dominion is growing top heavy, and while those at the top may not at the moment fully realize their danger, they are occupying a perilous position, and in their own interests and for their future self-protection it is high time they began to look to the agricultural foundations upon which all industry in Canada primarily rests.

Cures Constipation

In A Sensible Way
They Work While You Sleep—Cost Only a Quarter—And Really Bring Lasting Results

It only takes one night to prove the wonder-working power of Dr. Hamilton's Pills. They are the simplest, the easiest acting laxative yet devised, the kind that a child or delicate person can use with confidence. You can cure constiveness quickly, safely and with Dr. Hamilton's Pills. Headaches you can banish for all time. Impaired digestion you can promptly correct by their use. Loss of appetite is replaced by a keen desire to eat. The blood is enriched and reddened, in consequence you are given new vitality and vigor. All ailments of the bowels are cured. Folks who are half sick, sort of run down, lacking in spirits and energy, those who find a day's toil exhausting and body—there are the people who need Dr. Hamilton's Pills to vigorous health that will be in the market for all the time. Box of Hamilton's Pills today, sent everywhere.

Uses For Inferior Fruit

Ontarian Growers Will Manufacture Fruit Juices

The Ontarian Union Growers, the Ontario growers' association, has started a subsidiary company this year which will make use of all the fruit, apples particularly.

For too long, says an Exchange, British Columbia growers have shipped their inferior fruit to the fresh fruit markets, where it has pulled down the price of the better grades. It is a well known marketing rule that whenever a cheaper article comes onto the market, quotations of the better varieties drop to lower levels.

Then why do British Columbia fruit growers send their inferior fruit to market? Because they have no facilities to handle it so that some returns, however small, may be received. Now they intend manufacturing large quantities of inferior fruit into cider and fruit juices of various flavors.

The apple and cherry business is only in its infancy, and British Columbia up to the present has not taken advantage of this business in a big way. There are, to be sure, a number of cider mills scattered throughout the province but not nearly enough. And not only is cider in demand, but other fruit drinks. Loganberries, and the juices of other berries make palatable drinks.

Minard's Liniment Relieves Garget In Cows.
Promoter of Egg Production

States Will Want

Alberta Cattle

Live Stock Man From Chicago Sees A Market For Canadian

That there will be an enormous demand for Canadian feeders and stockers in the United States this fall, is the information given by A. A. Walters of the firm of Walters & Dunbar, one of the principal livestock commission houses in Chicago. Mr. Walters is at present in the West, looking into the cattle situation generally. He stated that without the slightest doubt stock raisers on the other side of the line this year would be able to absorb all the feeders and stockers that Alberta can offer this year at good prices.

According to Mr. Walters Canadian cattle are pre-eminently suitable for finishing purposes, compared to those from the southern and southwestern states, as they were able to stand the winter much better.

Every effort on the part of cattlemen here will be being taken to build the 27 percent tariff bill on Canadian cattle which was now before the Senate, and which has been passed by the lower house. The Senate, however, would not meet until December next, so that there would be no question about the free importation of animals this fall. While the demand was great at the present time for Canadian stockers and feeders this would be much more noticeable in about thirty days, as farmers in the corn belt were busy just now harvesting, by September first they would be through and would be in the market for all the time. They could lay their hands on one of the most important statements of Mr. Walters was that these farmers did not require any financial assistance from the banks in connection with the purchase of these cattle. They were mostly brought in comparatively small individual lots, and had ample means of providing all the necessary transportation. They were made on the Chicago market, also at St. Paul and Winnipeg. Canadian cattle rank very high in the United States," continued Mr. Walters. "They put on weight quickly and experiments carried out on a large scale prove conclusively that they are satisfactory in every way."

The South African Sweet

A remarkable sweet substance in a leaves of a South African plant was brought to notice several years ago, and was declared to be 180 times as sweet as cane sugar. The material was found in a bush not a true sugar, but a glycerine. The plant stems to have been difficult to obtain, but the U. S. Department of Agriculture has succeeded in getting a number of specimens of the dried leaves and a small quantity of the seed. The leaves are reported to be as sweet as saccharin, the marvelous coal tar product.

BABY'S GREAT DANGER DURING HOT WEATHER

More little ones during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach trouble come without warning, and when a mother is in a hurry to get her baby promptly the short delay type frequently means that the child has passed beyond aid. Baby's Own Tablets should always be kept in the house where there are young children. Occasional doses of the Tablets will prevent stomach and bowel trouble, or if the trouble comes suddenly the prompt use of the Tablets will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Baby's Own Medicine Co., Brockville, Ont.

A Smoke in the Air

Airman Responsible For Any Damage His Pipe May Cause

An airman who drops a lighted pipe from his plane is responsible for any damage his pipe may cause. This was decided at a recent discussion in Gray's Inn Hall, London, recently, at which Justice Darling presided. Justice Darling, in the course of his judgment, said that for an airman to take a lighted pipe and smoke it when flying at a point where if it fell it would fall by gravitation to the earth instead of to the moon, to allow it to fall or not prevent it to fall—was in itself prima facie negligence. If the pipe fell to earth and set fire to a haystack or did any other damage the person injured was entitled to an action to recover damages for negligence.

Crop Prospects

Estimates Wheat Yield at 250,000,000 Bushels

Canada's wheat fields will yield from 225,000,000 to 250,000,000 bushels this year. This estimate has been made by W. A. Black, vice-president and managing director of the Ogilvie Milling Company, and is based upon crop reports received by the company from its agents. Compared with last year's yield, this is an increase of 50,000,000 to 75,000,000 bushels.

The indications of worms are restlessness, grinding of the teeth, prickling of the nose, extreme nervousness, often convulsions. Under these conditions the worm is present, and can be got by Miller's Worm Powders. They will attack the worms as soon as administered and will grind them to atoms that pass away in the excrement. The little sufferer will be immediately eased and a return to the attack will not be likely.

Alberta to Protect Birds

— Alberta is providing protection for migratory birds by the establishment of seven large sanctuaries.

A FRIEND OF THE POLICEMAN

Continually on their feet, the "Peelers" are invariably troubled with corns and bunions—but not for long because they know of a quick cure, "Putnam's" Corn Extract; it cures painlessly in 24 hours; try "Putnam's," 25c at all dealers.

Peddle German Money

Smart Salesmen From U. S. Pick Up Fortune in Ontario

It is reported that two smart salesmen from across the line, both of extreme descent, have been peddling German marks, or coupons therefor, through the German settlements of western Ontario, particularly around Lanark, Tavistock and Shokan. They are said to get a commission of fifty cents on the dollar and to have cleared up a hundred thousand dollars in one week. Apparently they are working on behalf of New York curb brokers.

The people among whom they are working are extremely conservative, and prefer to leave their money at three and a half percent in the savings bank than risk it in speculation. But the appeal is racial. They are told that the money they invest will help put the fatherland on its feet, and that then, with the mark restored to par value, they will make a great profit. Needless to say they are paying a great deal more than current exchange for the mark, which they could buy over any Canadian bank house.

Among the victims it is said that two old Monmouth ladies took their life savings of ten thousand dollars out of the savings bank and invested the money in German marks at two or three times their current value price.

Thousands of mothers can testify to the virtue of Mother's Gown Extensior, because they know from experience how useful it is.

Don't marry a girl who thinks she might learn to love you. A little learning is dangerous thing.

Laying the Rural Districts

U. S. 1920 Census Will Show a Large Increase in Cities and Towns

For the first time in the history of the United States, the 1920 census returns will show that more persons live in the cities and towns than in the rural territory, officials of the census bureau estimated.

When the final tabulations are completed, the officials declared, they expect it to be shown that 31 or 32 percent of the total population of the continental United States reside in urban districts.

"There has been a very great tendency towards large increases in the cities and towns, which can be accounted for, unless it has come from the country," said Samuel L. Rogers, director of the census. "This tendency towards the cities has been apparent for some time."

A Corrobor of Pulmonary Trouble

Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in curing disorders of the respiratory process, but the best testimonial is experience, and the Oil is recommended to all who suffer from these disorders, but the certainty that they will find relief. It will allow inflammation in the bronchial tubes as no other preparation can.

A Case of Explosives

Magistrate—What is the charge? Policeman—Intoxicated, your honor.

Magistrate (to prisoner) What's your name? Prisoner—Gunn, sir.

Magistrate—Well, Gunn, I'll discharge you this time, but you must not get loaded again.— London Times.

Small Fraction of Available Land Is Under Cultivation

Among the natural resources of Canada agricultural land is by far the most important, the value of field crops alone being four times as great in 1919 as that of all other products of mines, fisheries and forests combined.

Canada has a land area of 2,306,502,400 acres, but obviously much of this is not adapted for cultivation. Without taking into consideration forest or swamp land, much of which will ultimately be tilled, nor of unexplored northern areas, there remains at least 300,000,000 acres available for agricultural development.

Only about one-sixth of these 300 million acres are under cultivation, and 250 million are still uncultivated. It is estimated that there are in Canada about 180 million acres of agricultural land in private ownership with a rural population of four and a half millions; in other words, not taking in account mining, lumbering, fishing, domestic duties and other activities, each Canadian man, woman and child living out of a town may on the average be assumed to be farming forty acres of land.

Europe the rural population on an average basis, but with far less widespread population is attending to 450 acres per head.

To utilize the agricultural land and thus widen the basic factor of Canada's production is of the utmost importance, for it is on this that the development of the other natural resources depends. The day of the free homestead within easy reach of a railway is rapidly becoming a thing of the past, and means other than free grants must be looked to for rural development.

Lieut. Flora Sandes

Fought With Serbian Army Until November, 1919

Mrs. Flora Sandes, lieutenant Flora Sandes of the Serbian army, is visiting Australia to interest the Commonwealth in measures for the amelioration of the country she served on the battlefield.

Mrs. Sandes went to Serbia with a party of V. A. D. in August, 1914. A year later she joined the Serbian Army, and fought in every battle until November, 1919, when she received 24 wounds and was taken to the field of battle. She was rescued and after six months rejoined the army and took part in the last victorious offensive.

Lieutenant Sandes took a commission rank by virtue of a special act of the Serbian Parliament. She has been given 12 months leave of absence by the Crown Prince of Serbia, in order that she may lecture in Australia and obtain supplies of agricultural machinery and other necessities. Mrs. Sandes has decorations which include the Serbian equivalent of the Victoria Cross.

Wind Resistance

Average Man When Walking Pushes One Half Pound

The average man, walking briskly, travels at about four miles per hour. His body presents to the air a surface of about 6 feet in height to one foot in width, or about six square feet. Moving at four miles per hour, he is travelling at 5.8 feet per second, and the resistance opposed to his forward motion by the air, assuming he is to be still, is just about 15 pounds. In other words he is continually pushing a 15 pound resistance ahead of him as he walks.

If the same man walking four miles per hour were facing a gale blowing 25 miles per hour, the resistance of the wind would be 30 miles per hour, and the man would be walking against a pressure of over 26 pounds. This would be enough to make an appreciable difference in the ease of walking and he would readily notice it.—Motor for July.

British Aviators Greet Americans

From a London dinner given to the survivors of the first 100 aviators who entered the service of Great Britain in the war, the Aero Club of America has received this message:

"This assemblage of the survivors of the first 100 British aviators, and the pioneers of British aviation, send cordial greetings to their American confreres of the British, and desire to make united wishes for the glorious achievements of America in the conquest of the air."

W. N. U. 1329.

Brooding and Feeding Chicks

Methods Have Changed Considerably And Breeders Should Be Up-To-Date

Brooding methods have undergone considerable changes of late. For decades the portable brooder has been the most satisfactory, but even with comparatively large flocks some are now using stove brooders. The advantages of the portable brooder are that they can brood large flocks at a comparatively small cost. The stove brooder was the system that was formerly used on large farms, and is still quite largely employed. It gives excellent satisfaction but is so expensive to install that the stove brooder are largely supplanted.

These stove brooders can be used in an ordinary colony house, thus avoiding the expense of a special brooder house. They are made in different sizes and will accommodate either large or small flocks. Five hundred chicks can be accommodated in a colony house with almost as little labor as 50 in a small brooder. The additional cost is comparatively low.

When the chicks are removed from the incubator care should be taken to avoid the danger of a sudden change in temperature. They should be so heated that they will be able to get a temperature of 100 degrees.

If the brooders are heated to 90 or 95 degrees before the chicks are put in them the heat generated by the chicks will bring it up to the desired temperature. It is better to give the chicks a low temperature as is consistent with their comfort. The temperature should be gradually raised, but never so quickly as to cause any discomfort to the chicks.

With the brooder stove the chicks are placed in the brooder house. If they want a little more heat they can get a little closer to the stove, if they get too warm they can spread out a little more. It is preferable when the chicks are first put into the brooder to make a ring around the stove in which the chicks can be confined until they become used to their new quarters and get accustomed to the source of heat, then the fence may be removed.

When the chicks are first put into the brooder to make a ring around the stove in which the chicks can be confined until they become used to their new quarters and get accustomed to the source of heat, then the fence may be removed.

Canada's Early Newspapers

The First Daily Paper Was Published In 1833

The delegates to the Imperial Press Conference are members of a profession many centuries old. The oldest newspaper is capable of so many interpretations that it would be difficult to name the publication entitled to be the oldest published for the first six months of this year, compared with a corresponding period in 1833. These figures are absolutely accurate, as they have been given out by the federal government.

This point to the fact that such progress is being made, but while this may be so all Alberta operators are unanimously agreed that a satisfactory freight rate could be obtained in Manitoba and other eastern points that the quantity that it is present being shipped would only be but a little while before it could be expected.

The official figures up to the end of June this year give an output of 304,040 tons, compared with 2,085,907 in 1833. This is for both the business and lignite product. It is doubtful, however, in the face of the possibility of orders that have been coming since the end of the period mentioned that the showing will be exceptionally good.

It is a matter over which the operators have no control, in other words, if there has been a falling off in orders the whole must be left to the public. The operators maintain that as far as actual quantities are concerned that the fangs of the industry has as yet been but touched.

Summed up in a nutshell, operators state, however, that there has been

Present Output of Alberta Coal Mines Is Far Below Capacity

To what extent the Alberta coal industry is being developed is indicated by official figures that have been published for the first six months of this year, compared with a corresponding period in 1833. These figures are absolutely accurate, as they have been given out by the federal government.

This point to the fact that such progress is being made, but while this may be so all Alberta operators are unanimously agreed that a satisfactory freight rate could be obtained in Manitoba and other eastern points that the quantity that it is present being shipped would only be but a little while before it could be expected.

The official figures up to the end of June this year give an output of 304,040 tons, compared with 2,085,907 in 1833. This is for both the business and lignite product. It is doubtful, however, in the face of the possibility of orders that have been coming since the end of the period mentioned that the showing will be exceptionally good.

It is a matter over which the operators have no control, in other words, if there has been a falling off in orders the whole must be left to the public. The operators maintain that as far as actual quantities are concerned that the fangs of the industry has as yet been but touched.

Summed up in a nutshell, operators state, however, that there has been

more coal marketed up to this time than in the history of coal production in Alberta. It should also be noted that this year more coal will be required from these mines than ever before on account of the shortage of coal from the United States.

The present prospects as far as the Winnipeg market is concerned, operators state, is most encouraging. The actual output, however, to that market, and to further eastern points, will solely depend upon freight rates. If these are prohibitive, it will mean that a staggering blow will be dealt the industry.

The provincial government has recently been carrying on with some measure of success, a very active program in Manitoba and Saskatchewan. This has been greatly helped by the shortage of coal from the United States.

While the bituminous mines in Alberta have been working fairly to capacity, the lignite fields, owing to lack of orders, have for some time now fallen far short of this; indeed, the output of the latter is not more than about half of what they could turn out.

It is pointed out that the coal deposits of the province are enormous, and that 10,000,000 tons a year could be but a fraction of what could be produced. It is asserted that the coal capacity of the province could take care of more than the figure mentioned.—Calgary Herald.

Farmers Advised To Ship Their Wool

Seems to be No Advantage in Holding For A Better Market

Although 200,000 pounds of wool has already been shipped to the east from Alberta, W. N. Gibson, assistant manager of the Calgary exhibition is of the opinion that wool growers of the province are holding back considerable in the hopes of higher prices.

At present, however, states a mistake, as the Canadian Co-operative Wool Growers' Association at Weston, Ont., to whom the wool is shipped, is working in the best interests of the wool growers, and will dispose of it in the very best market obtainable, and at the very best price.

Mr. Gibson declares that the market for wool is getting better, but if you offer any advance which may be slight, it is the fact that the freight rates to the east will undoubtedly increase, which will work to the disadvantage of the wool growers.

Sawdust Serves Many Purposes

Makes Excellent Gas for Both Lighting and Heating

Until quite recent times sawdust was regarded in wood mills as a waste product. Now it serves many purposes and has a commercial value of something like ten shillings a hundred.

Sawdust is particularly useful in the manufacture of various building materials. Mixed with clay it makes excellent bricks. It is also mixed with concrete and used for an economical and good wearing flooring material is obtained.

To French chemists belongs the discovery of sawdust gas. They found that a combination of various sawdusts, when subjected to a process of distillation, which is to be quite as effective as the best animal gas for coloring purposes.

Just An Old Shoe

Gives Comfort When Needed And Never Remits Abuse

What better friend can man or woman have than an old shoe? Of all the things in the world, an old shoe is the most regular thing. You would not be in company with it on. You would never bother cleaning it up or taking it away from you. It is in a dark corner of the closet, kicked about, befriended by none and giving nothing to any one.

Some day you start out with a new pair and aim to make an impression. Before night your poor feet are tired and sore. Blisters have appeared, and generally you are feeling miserable. You made the impression, but at heavy cost to yourself.

And God bless the old shoe! It is in between times. A handy, comforting thing is the old shoe, that costs you nothing and need not be bothered about or fussed over, but is always there when needed.

And God bless the old shoe! It is in between times. A handy, comforting thing is the old shoe, that costs you nothing and need not be bothered about or fussed over, but is always there when needed.

Canadian Flax

European Buyers Contract For 1920 Crop At Prices

The Department of Trade and Commerce has had the honor to prepare films of the flax industry, showing the processes of growing, ginning, spinning, the manufacture of yarns and other specialties. These are necessary in the manufacture of the flax fabric from field to merchandise. In the course of the year many hundreds of acres suitable for flax could not be sown owing to the shortage of seed, due to the quagmire of the war. The shortage is still, however, the largest in the history of the Dominion. European buyers are already purchasing or contracting for the 1920 crop at prices much higher than were received for last year's crop. The estimate is that there will be 40,000 acres more in flax in the prairie province this year, and the province of Quebec will also have a very considerable acreage. The outlook is good for the future. What a dunder, and the high water mark in prices is expected to be reached.

The X-Ray Detective

Shows Up Diamonds Secreted by the South African Natives

Diamond stealing in the South African Republic has become a serious business. The blacks still swallow them or hide them in self-inflicted wounds, but these methods no longer work. The X-ray method is so mounted in a frame as to illuminate the whole body of the suspected native standing before them. The entire body of each of the hundreds of miners can be thus brought into view in the fluoroscope in a few seconds, and any diamond present, even if hidden thick bones, is quickly detected. The glow of the diamond, under the X-rays, as well as its dense fluorescence, aids in detection. It is said.

It's a fact that a woman can't do a thing that her husband doesn't do. It's a fact that a woman can't do a thing that her husband doesn't do. It's a fact that a woman can't do a thing that her husband doesn't do.

House-made advice is just as satisfactory as any other advice.

New Western Map

Shows All Land Available For Homestead Entry

A new edition of a map of Manitoba, showing all the land available for homestead entry, has been issued by the Natural Resources Intelligence Branch of the Department of the Interior. The map is a valuable aid to the prospective settler, showing the location of the land, the size of the land, and the location of the land.

**RIGHT TO HAPPINESS
COMING TO THE REX**

Star Chamber Sessions of the
Russian Soviet Revealed
in Picture

The story of the overwhelming
love of a misguided girl for all
humanity is told in words of dra-
matic emphasis in "The Right to
Happiness," a new eight reel pro-
duction which will be presented at
the Rex theater on September
24th and 25th.

Universal's newest starring ve-
hicle for Dorothy Phillips was
conceived and directed by Allen
Holubar, who is also responsible
for Miss Phillips' previous big
success "The Heart of Human-
ity." Holubar, collaborating with
Olea Schull, wrote the story, and
with her help put it into scenario.
While "The Heart of Human-

ity" was a great love story, wov-
en into stupendous war-time
background, "The Right to Happi-
ness" is the voice of humanity
after the war, and in it is heard
the murmur of discontent and the
premonition of rumbling of the
social unrest that everybody
knows now exists not only in
America but the whole civilized
world.

Dorothy Phillips has achieved
dramatic heights never before at-
tained in her splendid depiction
of a difficult dual role. She han-
dles two characters as far apart
in their nature as the poles them-
selves. She is seen as Sonia, the
little comrade of the Russian rad-
icals, a dynamic, turbulent agitator,
and again as Vivian, the
American girl, who has been
reared in the idleness of luxury
and who finds a pseudo happiness
in gratifying her battle whims

and in toying with a mollycoddle
lover.
The production affords numer-
ous opportunities for spectacular
efforts, of which full advantage
has been taken by the director.
Among them may be named the
brutal pogrom of the Russian
Cossacks of old St. Petersburg of
nineteen years ago against the
Jewish population, which caused
the separation in babyhood of
two American twin girls.

One of the girls is adopted by
a Russian family and is reared in
radicalism. The other daughter
is taken to America with her father
and reared as the only child
of an American money lord. The
Russian girl is sent to America
as an envoy of the Russian anar-
chists. After a turbulent career,
she finally leads a crazed mob
against the palatial home of her
father. Holubar has evolved a
climax of a tremendously dra-
matic nature in his production.

**VIVIAN MARTIN HAS
MOST CAPTIVATING
ROLE IN "LOUISIANA"**

Dainty Star Seen to Advantage
in Mrs. F. H. Burnett's
Famous Story

Few of her pictures have af-
forded Vivian Martin, the dainty
and universally popular little
Paramount star, with such an
opportunity for dramatic depth
and genuine acting as "Louisiana,"
her latest Paramount picture,
which is to be shown at the
Rex theater next Monday and
Tuesday.

The photoplay is the picturiza-
tion of Francis Hodgson Burnet's
novel of the same name. This
is considered one of that
author's best novels, and one
which had a wide sale.

"Louisiana" does not concern
the locale of the story, but is the
name of the heroine around
whom the plot revolves. The
story starts in the mountains of
South Carolina where Louisiana
Rogers, who is just reaching ma-
turity, lives with her father, Lem
Rogers, a crude mountaineer.
His decision to send her to Okla-
homa Springs, a popular resort,
that she may see more of the
world, is strenuously objected

to by Cass Floyd, a young suit-
or who lives nearby in the moun-
tains. Nevertheless, Louisiana
goes and in the world of men and
money, she meets Laurence Fer-
rell, a young playwright, and a
love romance between the two
is soon budding.

Insanely jealous, Cass goes to
the Springs to keep an eye on
Louisiana and angrily at the
turn of events. In a fit of rage
he shoots at and seriously
wounds Laurence. The results
in many complications which
make the story one of the most
romantic in which the star has
yet appeared.

Robert Vignola directed and
Frank E. Garbutt was camera-
man. Supporting the star are
Robert Ellis, Noah Beery, Arth-
ur Allardt, Lillian Welch, Lillian
Leighton and other well known
players.

In preparing for the filming of
"The Right to Happiness," Allen
Holubar's production, he
Rex theater September 24 and
25, in which Dorothy Phillips is
the star, the director had to ac-
complish one of the hardest tasks
in the motion picture profession
that of finding twin babies,
both of whom will photograph
perfectly and who will synchron-
ize their movements to the sat-
isfaction of the director. In pro-
ducing "The Right to Happiness,"
Holubar had to obtain a set of
twins to stand the child of the
Dorothy Phillips, who plays a
dual role in the picture. Holubar
combed all over southern Cali-
fornia before he finally found a
pair of youngsters who could do
the parts satisfactorily. They
were actually obtained through the
ingenuity of a member of the
publicity department who had a
city hall newspaper reporter
check over the birth records for
three years back to discover what
southern Californians had be-
come the parents of the twins. A
list was given to Holubar's as-
sistant director, and the latter sent
the boys with an auto to bring
the families with twins before he
finally found little Esther and
Rachel Molme, of Allamira,
California.

Have you noticed that state
names are being used by parents
for the Christian names of their
offspring? Virginia, of course, is
a well known example, though it
seems to us that life state was
originally named after some fair
lady or other. The telephone
directory discloses the fact that
there is a Mary Land, too.
Washington is the exclusive
property of the male sex. And
now comes Vivian Martin who
plays the title role in "Louisiana,"
a Paramount picture. Louisiana
lives, incidentally, in South Car-
olina. Geographies please copy.
The name of the colored lady is
not stated.

An earthquake in Italy on
Tuesday killed hundreds of peo-
ple and did an enormous amount
of damage to property.

The auctioneer and clerk are
now ready to arrange dates for
auction sales this fall. Don't put
off too long; get your date ar-
ranged early.

IMPORTANT NOTICE

TAX RECOVERY ACT

To all parties whom it may concern.

Take notice that the provisions
of the Tax Recovery Act are op-
erative for the year 1920 within
the bounds of every municipality,
urban or rural, and every im-
provement District of the Prov-
ince of Alberta.

The land will be advertised for
sale, as soon after August 14th
as possible, by the Municipal
taxing authority, and on the day
and hour and at the place men-
tioned in the advertisement, will
be sold for the taxes as in ar-
rears of date December 31, 1919,
together with the costs. Owners,
mortgagees, encumbrances, and
any others interested, should
communicate with the municipal
authority levying the tax. The
arrear and costs may be paid up
to the time of sale, and after the
sale there is one year for the re-
demption of the land.

J. H. LAMB,
Deputy Minister of
Municipal Affairs.

TAX SALE

Sale of Lands in the Town of
Claresholm, for Arrears
of Taxes

Notice is hereby given that
certain lands in the Town of
Claresholm will be offered for
sale for arrears of taxes and
costs on Saturday the 2nd day
of October 1920, commencing at
2 o'clock p.m., at the Council
Chamber.

A full list of the said lands in
arrears may be found in the is-
sues of August the 13th and 20th
1920, of the Claresholm Review-
Advertiser; and unless such ar-
rears of taxes and costs are
satisfied I will proceed to sell
the land at the time and place
above mentioned.

Dated at Claresholm the 12th
day of August, 1920.
C. K. Miller,
Secretary-Treasurer,
Town of Claresholm.

NOTICE

The Claresholm School of Agri-
culture will re-open on October
29th, 1920. A large attendance
of students is expected during
the term of the school, and it is hoped
that the people of Claresholm
will open their homes to these
boys and girls. Those who wish
to take students either to room
or to board are asked to commu-
nicate with the principal at an
early date. Kindly state prefer-
ence for boys or girls, also state
whether rooms can be supplied
with or without board, terms,
etc.

Steady Dependable Service

IMPERIAL Polarine assures a motorist steady, dependable service
from his car. It gives correct lubrication to every type of motor
and every moving part. It keeps your motor running smoothly and
quietly.

Imperial Polarine maintains, under all operating conditions, exactly
the right body to seal in compression and reduce wear. It burns clean.
Imperial Polarine establishes and maintains a power tight seal between
piston and cylinder walls. Its body is proof against high heats and
the grueling friction of engaging parts.

Look for the Imperial Polarine Chart of Recommendations when you
buy oil. It shows which of the three grades described below is best
suited to your car.

Six sizes—gallon and four-gallon sealed cans, steel kegs, half-barrels
and barrels. Buy by the barrel or half-barrel and have
Sold by good dealers everywhere in Canada.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)

A GRADE SPECIALLY SUITED TO YOUR MOTOR

IMPERIAL OIL LIMITED

Power, Heat, Light, Lubrication

Branches in all Cities

"You're right! In the busy season when a trip to town
is necessary, you need a car that is ready to go. The
best car is no good without proper lubrication and good
gasoline. Imperial Polarine and Imperial Premier Gasoline
have kept my car running slick as a whistle every minute
all season."

**A NEW WAY TO SAVE
TIRES**

Let us vulcanize your old tires
which can possibly be saved in
this way. If on examination we
find that your casing is sound
the repair, we will exchange for
a new one, the Hercules which
has stood the test with others
on the market. Come in and
look them over.

H. D. WHYTE, Claresholm.

**NOTICE TO CREDITORS
AND CLAIMANTS**

In the Estate of Hans Gotfred
Fatland, late of Claresholm,
Cherigman, deceased.

Notice is hereby given that all
persons having claims upon the
estate of the above named Hans
Gotfred Fatland, who died on the
1st day of July 1920, are required
to file with the undersigned by
the 18th day of October 1920, a
full statement duly verified of
their claims and of any securities
held by them, and that on that
date the administrator will dis-
tribute the assets of the deceased
thereby, having regard only to the
claims of which notice has been
so filed or which have been
brought to his knowledge.

Dated this 7th day of September
1920.
Ole J. Berg, Administrator,
Claresholm, Alberta.
